

Generation Cognizant (GenC) Learner Handbook (Healthcare Functional and Automation)

Why do we need this GenC learning Program?

Gen C learning program engages young talents with a comprehensive learning pathway, giving the millennials an opportunity to interact with Subject Matter Experts (SME), understand the corporate environment, and groom themselves.

Cognizant emphasizes on Learner Autonomy where students take charge of their own learning, with the available tools and resources. More focus is on “learning” than “teaching”. Get ready to embark your own learning adventure!

Program at a glance

Learning consisting of 2 Stages:

- Stage 1 – Functional Testing and Core JAVA
- Stage 2 – Selenium Automation concepts and Healthcare Functional and Automation

Concepts– Inclusive of the Project Business Aligned Project

Interim Project Evaluation + Technical Evaluation

Final Project Evaluation + Final Technical Evaluation

Program Highlights

- The complete learning journey is formalized using adult learning principles, where problem solving and applying the skills gained are given more importance than conceptual learning.
- Learner Autonomy is encouraged via Flipped Classroom, where the learning platform offers world class learning resources, and students would not be constrained by tutelage of an instructor.
- Get mentored by SME, whose motivation and guidance will help you accelerate in the learning journey.
- This program is applicable to Interns as well as GEN Cs.

Know Your Service Line – QEA (Quality Engineer and Assurance)

Cognizant Quality Engineering & Assurance (QEA) focuses on ensuring the quality and reliability of enterprise processes, applications, and systems. QEA offers a comprehensive range of services including intelligent and automated quality assurance, modernization assurance, and experience assurance. These services are designed to accelerate business and technology changes, improve customer experiences, and ensure regulatory compliance. QEA also emphasizes the importance of automation and AI to enhance testing efficiency and deliver high-quality outcomes. By leveraging these advanced technologies, QEA helps businesses achieve digital success and maintain competitive advantage in the evolving digital landscape.

How QEA Transforms Quality Assurance at Cognizant?

Cognizant's Quality Engineering & Assurance (QEA) significantly transforms quality assurance by accelerating digital transformation and ensuring robust, reliable applications and systems. This seamless transition minimizes disruptions and speeds up technology adoption.

By embedding quality at every development stage, QEA enhances customer satisfaction and loyalty through high-performance, user-friendly products. Automation and AI-driven quality assurance streamline processes, reducing manual efforts and speeding up release cycles, which boosts operational efficiency and cuts costs. Rigorous testing and validation ensure compliance with industry regulations, crucial for sectors like healthcare and finance.

QEA also supports innovation by providing a reliable foundation for launching new products and entering new markets. Additionally, automated testing frees employees to focus on strategic tasks, enhancing productivity and job satisfaction. These combined impacts help businesses achieve strategic goals, maintain a competitive edge, and deliver exceptional value to their customers.

Notable & Successful Stories on Quality Assurance by QEA Cognizant Team...

Cognizant's Quality Engineering & Assurance (QEA) team partnered with a major health plan provider to overhaul their software quality assurance processes, addressing several critical challenges. The existing methods were outdated and inefficient, struggling to keep pace with the healthcare industry's evolving needs.

Ensuring compliance with stringent healthcare regulations was a significant concern, and the manual, fragmented processes led to delays and increased operational costs. Additionally, there was a pressing need to improve software quality to enhance patient care and overall service delivery.

QEA implemented automated testing frameworks and AI-driven quality assurance tools, significantly reducing manual efforts and accelerating the testing process. Rigorous testing and validation processes were established to ensure compliance with healthcare regulations, including continuous monitoring and real-time compliance checks.

By streamlining quality assurance processes and integrating advanced technologies, QEA improved the overall efficiency of the software development lifecycle.

The focus on quality from the start ensured that end products were reliable and user-friendly, leading to better patient care and satisfaction. As a result, the health plan provider saw a significant improvement in software quality and compliance, which was crucial for meeting healthcare regulations.

The enhancements in software quality directly contributed to better patient care and service delivery, while the automation and streamlined processes led to faster release cycles and reduced operational costs.

The time-to-market for software updates was significantly reduced, allowing the client to respond more quickly to market demands. This project exemplifies how Cognizant's QEA services can transform quality assurance processes, ensuring high-quality outcomes.

[Health plan rebuilds software QA with Cognizant Case Study | Cognizant](#)

Tips for Successfully Carrying Best Practices for Implementing and Maintaining Robust IT Infrastructure with QEA.

Understand the Basics: Start with a solid understanding of software development and testing fundamentals. Familiarize yourself with key concepts such as the software development lifecycle (SDLC), different types of testing (e.g., unit, integration, system, and acceptance testing), and the importance of quality assurance.

Learn Automation Tools: Gain proficiency in popular automation tools like Selenium, JUnit, and TestNG. Automation is crucial for efficient testing, and being skilled in these tools will enhance your ability to create reliable and repeatable tests.

Adopt the Page Object Model (POM): Use the Page Object Model design pattern to create maintainable and reusable code. This approach separates test logic from page elements, making your tests more organized and easier to manage.

Focus on Continuous Integration/Continuous Deployment (CI/CD): Understand and implement CI/CD practices. Tools like Jenkins help integrate testing into the development pipeline, ensuring that code changes are tested continuously and deployed seamlessly.

Embrace Agile and DevOps Practices: Agile and DevOps methodologies promote collaboration, speed, and quality. Learn how to work in these environments, focusing on continuous improvement and adaptability.

Prioritize Test Coverage: Develop comprehensive test plans that cover all aspects of the application, including functional, performance, security, and usability testing. Ensure that your tests are thorough and cover various scenarios.

Leverage AI and Machine Learning: Explore how AI and machine learning can enhance testing processes. These technologies can help predict potential issues, optimize test cases, and improve the overall effectiveness of quality assurance.

Implement Data-Driven Testing: Use data-driven testing to run the same test with different sets of data. This approach increases test coverage and ensures that your application works correctly with various inputs.

Maximize Browser Window: Ensure that your tests maximize the browser window to capture full-page screenshots and interact with all elements. This practice helps improve test accuracy and reliability.

Validate with Assertions: Use assertions to validate the outcomes of your tests. Assertions help ensure that the application behaves as expected and quickly identify any issues.

Continuous Learning and Improvement: Stay updated with the latest trends, tools, and best practices in quality assurance. Participate in training sessions, workshops, and online courses to continuously enhance your skills.

Collaborate and Communicate: Foster strong communication and collaboration with development, testing, and operations teams. Quality assurance is a shared responsibility, and effective teamwork is essential for success.

Learning Journey with Flipped Classroom

This program encourages you to be more autonomous learners during guided self-learning hours, completing the learning objectives on your own pace and style, and get ready for the hands-on practice time.

The complete learning path is set in the [GEN C Learn Platform](#), which you can login with SSO.

Recommended Program Sequence

The learning journey contains 2 stages, followed by a Business Aligned Project.

- Stage 1 – Functional Testing and Core JAVA
- Stage 2 – Selenium Automation Concepts and Healthcare Functional and Automation Concepts
- Business Aligned Project will provide you an experience of real time problem solving in Agile methodology.

Stage 1 – Functional Testing and Core JAVA

Day 1 to 10

- Functional Testing
- Core Java
- **Code Challenge (CC) Assessment**
- **ICT - Functional Testing(Integrated Capability Test) Assessment**

Stage 2 – Selenium Automation Concepts and Healthcare Functional and Automation

Day 11 to 30

- Health Care Domain
- Selenium and Automation Concepts
- GenAI Learnings
- Code Companion Tool-GitHubCopilot
- **Code Challenge (CC) Assessment**
- **ICT - SELENIUM and Automation Assessment**
- **Interim Technical Evaluation**

Day 31 to 50

- Health Care Domain CVS Training BU Sessions
- **Final Technical Evaluation**

Key Learning Components of the Program

Cognizant has collaborated with Udemy to provide world class learning videos for the evolving future of work. These Udemy programs are woven into a learning path, empowering you to plan and learn at your style.

The program also connects you with Subject Matter Experts (SMEs) to get the professional guidance on your queries in the learning journey.

The program doesn't ONLY concentrate on the technical skilling, but also on the shaping up of the Behavioral skills. **Behavioral learning** would be done in ILT mode, with few Self-paced learning modules too.

Evaluation Model

The program continuously evaluates if you can apply those self-learnt skills to solve a real-time business problem. Depicted below are the four key learning components, which are distributed across the learning journey for the purpose of continuous evaluation.

- Interim Evaluation (Project + Technical) through Video Interview
- Final Evaluation (Project + Technical) through Video Interview

The above evaluation components will attribute to the Performance Health Status (PHS) of a GenC. Additional Learning Components like Hands-On, Code Challenges and ICTs will help you to enhance your expertise level.

Interim & Final Evaluation Approach

Below is the Evaluation Structure for GenC Learning Journey

The interim evaluation will be held halfway through the learning journey, while the final evaluation will take place at the end of the learning journey.

During the interim evaluation, the GenC will be interviewed by a Technical Subject Matter Expert (SME) from the Business Unit (BU) to assess your knowledge through a technical discussion. Additionally, the Mini project completed by the GenC will also be evaluated by the BU SME. Please note that the Mini project is an individual activity and not a group activity.

During the final evaluation, the GenC will again be interviewed by a Technical SME from the BU to assess their knowledge through a technical discussion. In the same evaluation call, the Hackathon project completed by each group will be evaluated by the BU SME. Please note that the Hackathon project is a group activity and not an individual activity.

Preparatory Learning

For this automation track training, here are some preparatory learning materials that can be helpful for the interim and final technical evaluations. Preparatory learning material refers to resources, materials, and content that you can use to prepare. These materials are designed to provide you with the necessary knowledge, skills, and understanding to succeed in your learning objectives.

Remember, apart from these learning materials, actively participating in the training sessions, asking question and practicing hands-on exercises will greatly contribute to your overall learning and preparedness for the evaluations.

Program Completion Criteria

Stage 1 (Pre-requisites)			
Gating Criteria: Qualifier Assessment			
Stage 2 & Beyond (Advanced Skills)			
Gating Criteria: Performance Health Status is Green			
GenC/Intern Training	Evaluation Components	Pass Criteria	Evaluation Done by
Performance Health Status - PHS (only from Stage 2)	Interim Evaluation (Project + Technical)	Green,1 Attempt	BU SME
	Final Evaluation (Project + Technical)	Green,2 Attempts*	

100% Completion of Hands On in Stage 2 is mandatory for interim / final evaluation eligibility.

Key Check Point Intervals in the Learning Journey

Progressing to Stage 2 depends on clearing the qualifier assessment after stage 1. Candidates who do not clear the Stage 1 Qualifier will be terminated from the Internship. However, based on the demand and later needs, they will be considered for the CSD mode of training.

For ICT Assessments – These ICT are set as practice assessments. Duration is 4 hours, and Attempts provided for user to practice the assessment is 3.

For CC Assessments – These CC are set as practice assessments. Duration is 2 hours, and Attempts provided for user to practice the assessment is 3.

Subsequent stages learning journey, your progress will be measured. On the below check point intervals, your overall Performance Health Score will be calculated as on date, and the RAG status will be arrived.

Table - Check Point Intervals

Check points	Interpreting Status
Interim Evaluation	- Green - On Track for Graduation - Red /Amber - There will not be any re-attempts given
Final Evaluation	- Green - On Track for Graduation - Red /Amber – Only 2 attempts are given - (Attempt 2 is not applicable if the student is Red in Interim and Final Evaluation- Attempt 1) Note: If student fails after the applicable re-attempts, they will be considered as “Not-Graduated”.

Icebreaker

Icebreaker session will be conducted for a duration of initial **5 days**. During the session, various topics related to Corporate Induction, Talent Management, Cognizant Agenda on Core Values, Leader Talks, Alumni, BU Mentor connects will be covered. Followed by icebreaker, technical training will kick start.

Following sessions will be covered during the **5 days** of icebreaker

- Corporate Induction
- Talent Manager Connect

- Cognizant Agenda Sessions on Core Values
- Leader Talks (Academy) and many more...

A recommended day-wise schedule is provided below for the learning, with the learning content for the day, the practice hands-on and extended hands-on to be done for the day or

any other activities are listed. Few days might be interleaved to accommodate the extension due to Behavioral Training.

Mock Interview Session: This session is conducted to test candidate understanding and enhance candidates' best preparation for Interim & Final Evaluations.

GenAI-Program Overview

Introduction

AI Accelerate is a comprehensive program designed to empower learners with the knowledge and skills needed to harness the transformative potential of Artificial Intelligence (AI). This handbook serves as a guide, providing essential information and resources to help learners navigate through the program successfully. From understanding the fundamentals of AI to apply the advanced concepts in real-world scenarios. AI Accelerate is your gateway to unlock the power of AI and shaping the future of technology.

Program overview.

AI Accelerate offers a learning opportunity, allowing GenCs to engage learning through the self-paced learning, Expert connect, and Knowledge assessment to measure the skills.

Focus areas

- **Learning:** GenCs will have access to curated content and resources that cover a wide range of topics related to AI, including best practices, and case studies. This learning aspect aims to deepen GenCs understanding of AI and its applications in various industries.
- **Expert connect:** GenCs will have the opportunity to connect with expert in the field of AI. This expert will provide guidance, support, and insights to help GenCs navigate their learning journey and gain valuable insights into the industry.
- **Practice sessions:** GenCs can practice the use cases provided sessions that are designed to reinforce their learning and help them apply their knowledge in real-world scenarios. These sessions will provide GenCs with hands-on experience and practical skills that are essential for success in the field of AI.

Performance outcomes

Upon completing the self-paced learning component of AI Accelerate GenCs are expected to achieve the following performance outcomes:

- GenCs will demonstrate a thorough understanding of the fundamentals of AI, including key concepts, terminology, and principles.
- GenCs will be able to apply AI concepts and techniques to solve real-world problems, demonstrating their ability to analyze, design, and implement AI solutions.
- GenCs will develop and apply critical thinking and problem-solving skills in the context of AI, enabling them to identify, analyze, and address complex challenges.
- GenCs will collaborate effectively with peers, mentors, and industry experts to achieve common goals and contribute to the advancement of AI knowledge and practice.

Program workflow

Java Programming - Overview

What is Java Programming?

Java Programming is a versatile and widely used programming language that enables developers to create robust, high-performance applications. The process of Java programming involves several stages to ensure the development of efficient and maintainable software.

Purpose

Java programming is designed to be platform-independent, allowing developers to write code that runs on any device with a Java Virtual Machine (JVM). It emphasizes object-oriented principles, making it easier to create modular, reusable, and maintainable code.

For Example, Mobile Applications: Java is the primary language for Android app development. Many popular apps like Spotify, Twitter, and Netflix are built using Java12. Enterprise Applications: Java is extensively used in enterprise environments for building large-scale systems such as banking applications, customer relationship management (CRM) tools, and enterprise resource planning (ERP) solutions.

Software Requirements

Below are the software's need to be installed in system from Company Portal, before start proceeding with selenium projects like mini project and hackathon.

1. Eclipse Org Eclipse IDE 2023-12

2. Azul JDK Version 17
3. Google Project Hosting Selenium Java 4.15.0
4. Google Project Hosting Selenium Server Standalone 4.8.0
5. Apache Software Foundation, The Apache POI 5.2.4
6. Eclipse Org TestNG for Eclipse 7.4.0
7. Jenkins project Jenkins 2.251

NOTE: If genc's are facing any challenges while installation, trainer/mentor will help to install the software.

Objective to use the software:

- Developing the project
- Writing the code
- Debugging the errors
- Testing the applications

BU Mandatory - Technical learning and Handson – Core Java

NOTE: The Below topics will be covered by Trainers in Master sessions and relevant hands-on exercises will be provided as Daily Learning Exercises (DLE) for associates to practice.

Associates must complete the provided Udemy courses along with these BU Connect Master sessions. Hands-on practice and doubt clarification can be addressed during the trainer-led Master sessions.

Associates must also complete the self-paced learning and hands-on exercises available on the Tekstac Platform in parallel with the trainer-led sessions and DLE.

Click Here to View the [BU Aligned Technical Training Contents](#) Document.

Schedule – Stage 1: Day 1 to 10

Day 1 to 10 will be focusing on Functional Testing and Core Java.

Udemy learnings are recommended in the Platform to understand the fundamental concepts. Apply the concepts learned and solve the Hands-on and Practice Case studies as recommended below.

Continuous Learning: Technical Hands-on through Tekstac

Post Completion of the ILT session, Trainee must Practice the Handson provided in the Tekstac Platform. In build code editor is available in this platform and Handson are automatically evaluated when the code is compiled in the editor.

Continuous Learning: Java Practice Hands-on in Eclipse

You will Parallel Learn and complete the Tekstac Platform Hands-on exercises and practice Topic wise Java Practice Handson Daily . This Exercise is set for practice only and not mandate. But completion of Tekstac Platform Handson is mandate for enablement of

Assessments.

Follow these steps to practice - Topic Wise Java Practice Hands-on :

1. Software: Download the Eclipse software.
2. Practice Topic-wise Hands-on Exercises: Practice the given topic-wise hands-on exercises in your local environment using Eclipse daily post completion of Learning and platform driven Hands-on Exercise.
3. Submit for Evaluation: Once you have completed the exercises, submit them for evaluation.

BU Mandatory - Self Learning Contents – Core Java

Day 1 to 10 you will be learning Functional Testing Concepts and Core JAVA Concepts Parallely.

Day 1 & Day 2

Functional Testing

Continuous Learning: Technical Enablement

Learn the basics of Agile Fundamentals and Software Testing Life Cycle

[Agile Fundamentals: Including Scrum & Kanban](#)

[Learn Manual Software Testing + Agile with Jira Tool](#)

Refer sections 1 and 2 in this Udemy course and complete the corresponding learnings.

Section 1: Software Testing Introduction

What is Software?

Types of Software's?

What is Software Testing?

What is Software Quality?

Project Vs Product

Why do we need Testing?

Error, Bug & Failure Why the software has bugs?

Section 2: Software Testing Concepts

SDLC

Waterfall Model

Spiral Model

V-Model

Static Testing & Dynamic Testing

Java

Continuous Learning: ILT Enablement

Chapter	Chapter Name	Topic
Chapter-1	Introduction to Java, Data Types and Variables	History & Features of Java: OOP, platform independence, JVM, JDK, JRE Data Types: Primitive and non-primitive types, Variable declaration, Type casting
Chapter-2	OOP Basics	Object-Oriented Principles: Encapsulation, Inheritance, Polymorphism, Abstraction Classes and Objects: Class structure, Object creation, Instance variables Constructors: Default constructor, Parameterized constructor, Constructor overloading

Continuous Learning: Technical Enablement through Self-learning

After completing each chapter of the ILT (Instructor-Led Training), trainees should:

1. Practice the mandatory hands-on exercises on the Tekstac platform.
2. Work on the provided - Java Practice Hands-on in Eclipse hands-on exercises in Eclipse.
Eligibility to attend stage 1 assessment: Trainee is expected to complete all the Tekstac platform Hands-on including Java Practice Hands-on in Eclipse. kindly submit Java Practice Hands-on in Eclipse exercise code in notepad(as zip file in Tekstac platform for Evaluation).
3. Refer to and learn the same topics covered by the trainer on Udemy.

This approach ensures comprehensive understanding and reinforcement of the topics.

Continuous Learning: Technical Hands-on through Tekstac

Mandatory Hands-on

- Streamline Your Health Journey
- Water Tank Capacity
- Square Series

Continuous Learning: Java Practice Hands-on in Eclipse

Basic Syntax

- Simple Java program
- Print an integer value
- Command line arguments
- Print the input from scanner

Object Oriented Programming

- Object Oriented Programming
- Constructors
- Abstract Classes
- Interfaces
- Static Members
- Final Keyword
- Miscellaneous
- Factorial of a number using recursion
- Find the factorial of a given number
- See the output as 0, 1, 1, 2, 3
- Find the biggest number among 1,2,3,4,5,65,76,5,4,33,4,34,232,3,2323
- Read and write a file
- Print the below output
- Print the triangle of numbers

Learn and Practice

[Learn Selenium with Java, Cucumber & Frameworks.](#)

Refer section 2 in this Udemy course and complete the corresponding learnings.

Section 2: Java Programming

Continuous Learning: ILT Enablement

Chapter	Chapter Name	Topic
Chapter-3	Inheritance, Abstraction & Encapsulation	Inheritance: Single inheritance, Multilevel inheritance, super keyword
		Polymorphism: Method overloading, Method overriding
		Abstraction: Abstract classes, Interfaces
		Encapsulation: Access modifiers (public, private, protected), Encapsulating data

Continuous Learning: Technical Enablement through Self-learning

After completing each chapter of the ILT (Instructor-Led Training), trainees should:

1. Practice the mandatory hands-on exercises on the Tekstac platform.
2. Work on the provided - Java Practice Hands-on in Eclipse hands-on exercises in Eclipse.
Eligibility to attend stage 1 assessment: Trainee is expected to complete all the Tekstac platform Hands-on including Java Practice Hands-on in Eclipse. kindly submit Java Practice Hands-on in Eclipse exercise code in notepad(as zip file in Tekstac platform for Evaluation).
3. Refer to and learn the same topics covered by the trainer on Udemy.

This approach ensures comprehensive understanding and reinforcement of the topics.

Continuous Learning: Technical Hands-on through Tekstac

Mandatory Hands-on

- Streamline Your Health Journey
- Water Tank Capacity
- Square Series
- WordZee
- Fishing competition

Continuous Learning: Java Practice Hands-on in Eclipse

Basic Arithmetic Operations

- Java program to swap two numbers
- Convert from Fahrenheit to Celsius
- Swap two numbers without using a third variable
- Java program to add two numbers
- Java program to find the GCD of two numbers
- Java program to find the LCM of two numbers
- Java program to print the sum of digits of a number

Learn and Practice

- Handson2:

Java

Continuous Learning: ILT Enablement

Chapter	Chapter Name	Topic
Chapter-4	Keywords	Static Members: Static variables, Static methods, Static blocks
		this and super: Referring current object, Accessing parent class methods
		final keyword: Final variables, Final methods, Final classes
Chapter-5	Arrays,Strings,StringBuffer & StringBuilder	Arrays: One-dimensional array, Multidimensional array, Array traversal and operations
		Strings: String class, Immutability, String methods: length, substring, equals, etc.
		StringBuffer & StringBuilder: Mutability, Common methods: append, insert, delete

Continuous Learning: Technical Enablement through Self-learning

After completing each chapter of the ILT (Instructor-Led Training), trainees should:

1. Practice the mandatory hands-on exercises on the Tekstac platform.
2. Work on the provided - Java Practice Hands-on in Eclipse hands-on exercises in Eclipse.

Eligibility to attend stage 1 assessment: Trainee is expected to complete all the Tekstac platform Handson including Java Practice Hands-on in Eclipse. kindly submit Java Practice Hands-on in Eclipse exercise code in notepad(as zip file in Tekstac platform for Evaluation).

3. Refer to and learn the same topics covered by the trainer on Udemy.

This approach ensures comprehensive understanding and reinforcement of the topics.

Continuous Learning: Technical Hands-on through Tekstac

Mandatory Hands-on

- Mass Of Rocket Component
- Lego Builders
- Mythic Rhythms

Continuous Learning: Java Practice Hands-on in Eclipse

Control Flow Statements

- Demonstrate if...else statement
- Demonstrate nested if...else if... statement
- Demonstrate nested if...else statement
- Find odd and even numbers
- Printing the prime numbers
- Check whether a given number is Armstrong
- Check if a number is prime
- Check if a number is a palindrome
- Check if a number is an Armstrong number

Learn and Practice

[Learn Selenium with Java, Cucumber & Frameworks](#)

Refer section 2 in this Udemy course and complete the corresponding learnings.

Section 2: Java Programming

Java

Continuous Learning: ILT Enablement

Chapter	Chapter Name	Topic
Chapter-5	Arrays,Strings,StringBuffer & StringBuilder	StringBuffer & StringBuilder: Mutability, Common methods: append, insert, delete
Chapter-6	Exception Handling	Types of Exceptions: Checked exceptions, Unchecked exceptions
		try-catch Block: Single try-catch, Multiple catch, finally block
		throw and throws: Manually throwing exceptions, Propagating exceptions

Continuous Learning: Technical Enablement through Self-learning

After completing each chapter of the ILT (Instructor-Led Training), trainees should:

1. Practice the mandatory hands-on exercises on the Tekstac platform.
2. Work on the provided - Java Practice Hands-on in Eclipse hands-on exercises in Eclipse.
Eligibility to attend stage 1 assessment: Trainee is expected to complete all the Tekstac platform Hands-on including Java Practice Hands-on in Eclipse. kindly submit Java Practice Hands-on in Eclipse exercise code in notepad(as zip file in Tekstac platform for Evaluation).
3. Refer to and learn the same topics covered by the trainer on Udemy.

This approach ensures comprehensive understanding and reinforcement of the topics.

Continuous Learning: Java Practice Hands-on in Eclipse

Loops

- Demonstrate for loop
- Print stars using for loop, where the number of stars printed should be equal to the row number
- Demonstrate while loop
- Print the entered number in reverse
- Demonstrate the usage of break statement inside while loop
- Print the alphabets using for loop
- Demonstrate the usage of break and continue statements inside while loop
- Demonstrate for each loop
- Print Floyd's triangle
- Print Pascal's triangle
- Print the Fibonacci series
- Printing the Multiplication table
- Find the factorial of a number
- Print the prime numbers up to a given number
- Calculate the power of a number using a while loop
- Verify whether a number is a perfect number or not
- Printing the Fibonacci series from 1 to 10
- Find the greatest of three numbers
- Print the largest two numbers from an array of given numbers

Learn and Practice

Continuous Learning: Technical Hands-on

Mandatory Hands-on

- Hotel Booking

Manual Hands-on

- Handson3:
- Handson4:
- Handson5:

Deliverables Expected:

Deliverable 1: Identify four test scenarios for the mentioned requirement.

Deliverable 2: Write all the test cases using the appropriate testing techniques wherever applicable.

Deliverable 3: Log the defects below effectively with all the details relating the requirement mentioned such that the developers would understand.

Java

Continuous Learning: ILT Technical Enablement

Chapter	Chapter Name	Topic
Chapter-6	Exception Handling	Custom Exceptions: Creating custom exceptions
Chapter-7	Java Collections	Introduction to Collections: Collection hierarchy, Collection interfaces (List, Set, Map)
		List Interface: ArrayList, LinkedList, Vector, Stack

Continuous Learning: Technical Enablement through Self-learning

After completing each chapter of the ILT (Instructor-Led Training), trainees should:

1. Practice the mandatory hands-on exercises on the Tekstac platform.
2. Work on the provided - Java Practice Hands-on in Eclipse hands-on exercises in Eclipse.
Eligibility to attend stage 1 assessment: Trainee is expected to complete all the Tekstac platform Handson including Java Practice Hands-on in Eclipse. kindly submit Java Practice Hands-on in Eclipse exercise code in notepad(as zip file in Tekstac platform for Evaluation).
3. Refer to and learn the same topics covered by the trainer on Udemy.

This approach ensures comprehensive understanding and reinforcement of the topics.

Continuous Learning: Technical Hands-on through Tekstac

Mandatory Hands-on

- College Namelist
- Babitha's App

- Alta Motors

Continuous Learning: Java Practice Hands-on in Eclipse

Method Overloading and Overriding

- Final methods be overloaded
- Static methods be overloaded
- Final methods be overridden
- Static methods be overridden
- Overload a main method in Java
- Object u have created

POLYMORPHISM & INHERITANCE

- Demonstrate method overloading
- Demonstrate method overriding
- Demonstrate inheritance
- Demonstrate the use of the 'super' keyword

Learn and Practice

Section 2: Java Programming

Java

Continuous Learning: ILT Technical Enablement

Chapter	Chapter Name	Topic
Chapter-7	Java Collections	Set Interface: HashSet, LinkedHashSet, TreeSet
		Map Interface: HashMap, LinkedHashMap, TreeMap, Hashtable
		Iterator: Iterator, ListIterator

Continuous Learning: Technical Enablement through Self-learning

After completing each chapter of the ILT (Instructor-Led Training), trainees should:

1. Practice the mandatory hands-on exercises on the Tekstac platform.
2. Work on the provided - Java Practice Hands-on in Eclipse hands-on exercises in Eclipse.
Eligibility to attend stage 1 assessment: Trainee is expected to complete all the Tekstac platform Hands-on including Java Practice Hands-on in Eclipse. kindly submit Java Practice Hands-on in Eclipse exercise code in notepad(as zip file in Tekstac platform for Evaluation).
3. Refer to and learn the same topics covered by the trainer on Udemy.

This approach ensures comprehensive understanding and reinforcement of the topics.

Continuous Learning: Java Practice Hands-on in Eclipse

Arrays

- Find the largest number
- Remove duplicates from an array
- Find the second largest number in an array?
- Sort an array using bubble sort
- Sort an array using selection sort
- Sort an array using insertion sort
- Implement binary search
- Implement linear search
- Find the sum of elements in an array
- Find the average of elements in an array
- Find the maximum and minimum elements in an array
- Remove duplicates from an array
- Find the second largest number in an array
- Find duplicate elements in a Java Array
- Find the smallest and largest numbers in a Java Array
- Java program to swap two strings without using temp or third variable
- Demonstrate creating an array
- Duplicate elements in an array of numbers
- Demonstrate creating a multidimensional array
- Print the elements of the array in reverse
- Print alternative elements in a String array
- Find the greatest number in an integer array
- Find the least number in an integer array
- Using a for loop with single-dimensional arrays
- Using a for-each loop with single-dimensional arrays

Learn and Practice

[Java Database Connection: JDBC and MySQL](#)

- Go through entire course.
- Implement the examples along with the author.

Streams and Optionals

- <https://www.geeksforgeeks.org/java-8-stream-tutorial/?ref=lbp>

Note: On Day 6 - Once completing Udemy course, Learnings, all Hands-on & Practice assessments related to **Java** skill appear for the **Java -Code Challenge Assessment**. This will help you to assess and apply the concepts of the skill learnt in the platform.

Assess-Type-1: Code Challenge – Java - Group 1

Assessment Duration: 2 hrs.

Assessment Attempts: 3

Day 8, Day 9 & Day 10

Functional Testing

Continuous Learning: Technical Enablement

Learn the basics of Agile Fundamentals Concepts and Software Testing Life Cycle.

[Agile Fundamentals: Including Scrum & Kanban](#)

[Learn Manual Software Testing + Agile with Jira Tool](#)

Refer to section 4 and 5 in this Udemy course and complete the corresponding learnings.

Section 4: Software Testing Live Project (E-Commerce Domain)

Introduction to AUT, FRS, Creating Test Plan & Test Scenarios

Test Cases & RTM (Requirement Traceability Matrix)

Test Cases, Environment Setup(Test Bed) & Deploy Application

Test Execution & Defect Reporting

Section 5: Agile Testing Process and Working with Jira Tool

Agile Testing Process & Terminology

Working with Jira Tool

Continuous Learning: Technical Hands-on

Mandatory Hands-on

- Students Enquiry Form

Manual Hands-on

- Handson6:
- Handson7:
- Handson8:

Deliverables Expected:

Deliverable 1: Identify four test scenarios for the mentioned requirement.

Deliverable 2: Write all the test cases using the appropriate testing techniques wherever applicable.

Deliverable 3: Log the below mentioned defects effectively with all the details relating to the requirement mentioned such that the developers would understand.

Additional Learning:

Technical Quizzes:

Functional Testing

Java

Continuous Learning: ILT Technical Enablement

Chapter	Chapter Name	Topic
Chapter-7	Java Collections	Comparable & Comparator: Sorting with Comparable, Sorting with Comparator
Chapter-8	Java Thread Handling	Introduction to Threads: Thread vs Process, Thread lifecycle
		Creating Threads: Extending Thread class, Implementing Runnable interface
		Thread Methods: sleep(), join(), start(), run()
Chapter-9	Java File Handling	Character Streams: FileReader, FileWriter, BufferedReader, BufferedWriter

Continuous Learning: Technical Enablement through Self-learning

After completing each chapter of the ILT (Instructor-Led Training), trainees should:

1. Practice the mandatory hands-on exercises on the Tekstac platform.
2. Work on the provided - Java Practice Hands-on in Eclipse hands-on exercises in Eclipse.
Eligibility to attend stage 1 assessment: Trainee is expected to complete all the Tekstac platform Handson including Java Practice Hands-on in Eclipse. kindly submit Java Practice Hands-on in Eclipse exercise code in notepad(as zip file in Tekstac platform for Evaluation).
3. Refer to and learn the same topics covered by the trainer on Udemy.

This approach ensures comprehensive understanding and reinforcement of the topics.

Continuous Learning: Java Practice Hands-on in Eclipse

String Handling

- Java program to compare two strings

- Java program to reverse a string
- Java program to count the number of vowels and consonants in a string
- Java program to find the frequency of characters in a string
- Java program to check if two strings are anagrams
- A string such that the first character is uppercase, the second is lowercase, and so on the numbers from a string and print only the alphabets
- Reverse the words in a sentence
- The frequency of words in a paragraph

Learn and Practice

[Java Database Connection: JDBC and MySQL](#)

- Go through the entire course.
- Implement the examples along with the author.

Java

Continuous Learning: Technical Enablement

Chapter	Chapter Name	Topic
Chapter-9	Java File Handling	File Handling: File class, File reading and writing (FileInputStream, FileOutputStream)
Chapter-10	JDBC (Java Database Connectivity)	JDBC API Overview: JDBC architecture, Driver Manager, Statement and PreparedStatement
		CRUD Operations: Insert, Update, Delete, Select Queries
		Transactions: Commit, Rollback, Savepoints

Continuous Learning: Technical Enablement through Self-learning

After completing each chapter of the ILT (Instructor-Led Training), trainees should:

1. Practice the mandatory hands-on exercises on the Tekstac platform.
2. Work on the provided - Java Practice Hands-on in Eclipse hands-on exercises in Eclipse.
Eligibility to attend stage 1 assessment: Trainee is expected to complete all the Tekstac platform Hands-on including Java Practice Hands-on in Eclipse. kindly submit Java Practice Hands-on in Eclipse exercise code in notepad(as zip file in Tekstac platform for Evaluation).
3. Refer to and learn the same topics covered by the trainer on Udemy.

This approach ensures comprehensive understanding and reinforcement of the topics.

Continuous Learning: Java Practice Hands-on in Eclipse

Exception Handling

- Demonstrate exception handling using try-catch
- Demonstrate the use of finally block
- Demonstrate the use of throw and throws
- Demonstrate custom exceptions

- Demonstrate the advantage of finally in Exception Handling
- Custom class which is immutable

Learn and Practice

[Java Database Connection: JDBC and MySQL](#)

- Go through the entire course.
- Implement the examples along with the author.

Continuous Learning: ILT Technical Enablement

Chapter	Chapter Name	Topic
Chapter-11	Java 8 Features	Lambda Expressions: Lambda syntax, Functional interfaces
		Stream API: Stream operations (filter, map, reduce)
		Optional Class: Avoiding NullPointerException with Optional
Chapter-12	Generics & Annotations	Generics: Generic classes, methods & wildcards
		Annotations: Built-in annotations (@Override, @Deprecated) & Custom annotations

Continuous Learning: Technical Enablement through Self-learning

After completing each chapter of the ILT (Instructor-Led Training), trainees should:

1. Practice the mandatory hands-on exercises on the Tekstac platform.
2. Work on the provided - Java Practice Hands-on in Eclipse hands-on exercises in Eclipse.
Eligibility to attend stage 1 assessment: Trainee is expected to complete all the Tekstac platform Hands-on including Java Practice Hands-on in Eclipse. kindly submit Java Practice Hands-on in Eclipse exercise code in notepad(as zip file in Tekstac platform for Evaluation).
3. Refer to and learn the same topics covered by the trainer on Udemy.

This approach ensures comprehensive understanding and reinforcement of the topics.

Continuous Learning: Java Practice Hands-on in Eclipse

Collections Framework

- Java program to demonstrate the use of collections (ArrayList)
- Java program to demonstrate the use of collections (HashMap)
- Java program to demonstrate the use of collections (HashSet)
- Java program to demonstrate the use of collections (LinkedList)
- Java program to demonstrate the use of collections (TreeSet)
- Java program to demonstrate the use of collections (PriorityQueue)
- Java program to demonstrate the use of collections (Stack)
- Java program to demonstrate the use of collections (Vector)

- Go through entire course.
- Implement the examples along with the author.

Java

Continuous Learning: ILT Technical Enablement

Chapter	Chapter Name	Topic
Chapter-12	Generics & Annotations	Annotations: Built-in annotations (@Override, @Deprecated) & Custom annotations
Chapter-13	Design Patterns	Design Patterns: Singleton, Factory, Observer, Strategy patterns

Continuous Learning: Technical Enablement through Self-learning

After completing each chapter of the ILT (Instructor-Led Training), trainees should:

1. Practice the mandatory hands-on exercises on the Tekstac platform.
2. Work on the provided - Java Practice Hands-on in Eclipse hands-on exercises in Eclipse.
Eligibility to attend stage 1 assessment: Trainee is expected to complete all the Tekstac platform Hands-on including Java Practice Hands-on in Eclipse. kindly submit Java Practice Hands-on in Eclipse exercise code in notepad(as zip file in Tekstac platform for Evaluation).
3. Refer to and learn the same topics covered by the trainer on Udemy.

This approach ensures comprehensive understanding and reinforcement of the topics.

Continuous Learning: Java Practice Hands-on in Eclipse

Collections Framework

- Java program to demonstrate the use of collections (Deque)
- Java program to demonstrate the use of collections (LinkedHashMap)
- Java program to demonstrate the use of collections (LinkedHashSet)
- Find duplicates in a list
- Two HashMaps for equality
- Creating an ArrayList
- Creating a LinkedList
- Creating a HashSet
- Creating a LinkedHashSet
- Creating a TreeSet
- Creating a PriorityQueue
- Creating a HashMap using the Map interface
- Creating a LinkedHashMap
- Creating a TreeMap

Learn and Practice

[Java Database Connection: JDBC and MySQL](#)

- Go through the entire course.
- Implement the examples along with the author.

Additional Learning:

Technical Quizzes:

- Applying Object Oriented Concepts in java

Java

Continuous Learning: Technical Enablement through Tekstac

Mandatory Learning

Java 8 Features - Streams and Optionals. Asynchronous and Parallel Programming in Java 8.
Go through web pages to learn below specific topics

[Asynchronous and Parallel Programming](#)

[Java User Input \(Scanner\)](#)

Additional Learning

[Java In-Depth: Become a Complete Java Engineer!](#)

Go through only below mentioned sections 16 & 17 and implement the examples along with the author

- Section 16: Collections Framework (aka Data Structures)
- Section 17: Generics

Additional Learning:

Technical Quizzes:

- Quiz 3 - Collections Framework
- Quiz 4 - Advanced Java Concepts

Note: On Day 8 - Once completing Udemey course, Learnings, all Handson & Practice assessments related to **Java** skill appear for the **Java -Code Challenge Assessment**. This will help you to assess and apply the concepts of the skill learnt in the platform.

Assess-Type-1: Code Challenge – Java - Group 2

Assessment Duration: 2 hrs.

Assessment Attempts: 3

No.of Questions appear in each attempt: 1

Note: On Day 10-Once completing Udemey course, Learnings, all Handson & Practice assessments related to **Functional Testing** skill appear for the **Functional Testing -ICT**

Assessment. This will help you to assess and apply the concepts of the skill learnt in the platform. Attempts allowed to practice the assessment is 3.

Assessment Duration: 4 hrs

Assessment Attempts: 3

No.of Questions appear in each attempt: 1

Functional Testing -Assess Type 2 Skill Based Assessment.

- Read the requirements carefully of the Assessment Question.
- Write the Defect Description for the Test Case in Excel Sheet
- Submit the Test deliverables

Schedule – Stage 2: Day 11 to 40

Day 11 to Day 30 you will be learning Healthcare Domain for 6 hrs handled by BU and Selenium Automation Concepts for 3hrs per day.

Day 31 to Day 50 you will learning completely on Healthcare Domain handled by BU.

Day 11 - Day 13

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Basic Training	
1	Healthcare Basics and Functional Testing
2	Basics of Pharmacy Benefits
3	Excel Fundamentals
4	Introduction to Testing Tools
5	SFDC Walkthru & Usage
6	Client Requirement Walkthru Part 1
7	Client Requirement Walkthru Part 2

Mandatory Hands-on

- Mentor Driven - Hands on

Automation Concepts, configuration, WebDriver Basics

Click Here to View the [BU Mandatory Technical Learning and Handson](#) Document.

Continuous Learning: ILT Technical Enablement

Chapter	Chapter Name	Topic
Chapter 1	Selenium Basics and overview	Introduction to Browser Automation
		What is Selenium and Overview
		History and evolution of Selenium
		Selenium Components (WebDriver vs Selenium IDE vs Selenium Grid)
		Supported programming languages (Java, Python, C#, etc.)
		Cross-browser and cross-platform compatibility.
		Advantages and limitations of Selenium

Continuous Learning: Technical Enablement through Self-learning

After the Trainer-Led Master session on Selenium chapter topics, trainees should:

1. Refer to and learn the same topics covered by the trainer on Udemy.
2. Practice the Tekstac Platform Handson.

This ensures a thorough understanding and application of the Selenium chapter topics.

Continuous Learning: Technical Hands-on through Tekstac

Mandatory Hands-on

- Find Element by Id
- Find Element by Name

Learn the basics of WebDriver Basics

[Learn Selenium with Java, Cucumber & Frameworks](#)

Refer section 3 in this Udemy course and complete the corresponding Subtopics from 17 to 25

Section 3: Selenium WebDriver

Automation Concepts, configuration, WebDriver Basics

Continuous Learning: ILT Technical Enablement

Chapter	Chapter Name	Topic
Chapter 2	Selenium Architeture	What is Selenium Webdriver: 1) WebDriver is one of the component in selenium. 2) WebDriver is a java interface. 3) WebDriver is an API(Application Programming interface) Understanding the WebDriver Architecture / API methods. WebDriver, RemoteWebDriver, ChromeDriver , FirefoxDriver, EdgeDriver etc..
Chapter 3	Setting up Selenium environment	Installing Java Development Kit (JDK) and Eclipse IDE Downloading Selenium WebDriver Configuring Selenium WebDriver with Eclipse

Continuous Learning: Technical Enablement through Self-learning

After the Trainer-Led Master session on Selenium chapter topics, trainees should:

1. Practice Tekstac Platform Handson and Review respective BU Training Content chapter's PPT and video learning content.
2. Practice DLE (Daily Learning)hands-on exercises provided in the local environment.
3. Submit the solutions for evaluation.
4. Refer to and learn the same topics covered by the trainer on Udemy.

This ensures a thorough understanding and application of the Selenium chapter topics.

BU Training Content - Chapter Wise [BU Mandatory Technical Learning and Handson]

- Chapter 2_Handson
- Chapter 2_PPT Learning Ref.Content
- Chapter 2_Video Learning Ref.Content
- Chapter 3_Handson
- Chapter 3_PPT Learning Ref.Content
- Chapter 3_Video Learning Ref.Content

[Learn Selenium with Java, Cucumber & Frameworks](#)

Refer section 3 in this Udemy course and complete the corresponding Subtopics from 17 to 25

Section 3: Selenium WebDriver

Automation Concepts, configuration, WebDriver Basics

Continuous Learning: Technical Enablement

Chapter	Chapter Name	Topic
Chapter 4	Selenium WebDriver	Locating GUI Elements in Application Under Test (AUT)
		How to identify the locators in web page
		First Selenium Webdriver Script
		Launching Browsers in Selenium

Continuous Learning: Technical Enablement through Self-learning

After the Trainer-Led Master session on Selenium chapter topics, trainees should:

1. Practice Tekstac Platform Handson and Review respective BU Training Content chapter's PPT and video learning content.
2. Practice DLE (Daily Learning) hands-on exercises provided in the local environment Submit the solutions for evaluation.
3. Refer to and learn the same topics covered by the trainer on Udemy.

This ensures a thorough understanding and application of the Selenium chapter topics.

Continuous Learning: Technical Hands-on through Tekstac

Mandatory Hands-on

- Find options in dropdown
- Find Radio Element

Continuous Learning: Technical Enablement through Self-learning

After the Trainer-Led Master session on Selenium chapter topics, trainees should:

1. Practice Tekstac Platform Handson and Review respective BU Training Content chapter's PPT and video learning content.
2. Practice DLE (Daily Learning) hands-on exercises provided in the local environment
3. Submit the solutions for evaluation.
4. Refer to and learn the same topics covered by the trainer on Udemy.

This ensures a thorough understanding and application of the Selenium chapter topics.

BU Training Content - Chapter Wise [BU Mandatory Technical Learning and Handson]

- Chapter 4_Handson
- Chapter 4_PPT Learning Ref.Content
- Chapter 4_Video Learning Ref.Content

[Learn Selenium with Java, Cucumber & Frameworks](#)

Refer section 3 in this Udemy course and complete the corresponding Subtopics from 17 to 25

Section 3: Selenium WebDriver

Day 14 - Day 15

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Basic Training	
8	Introduction to Claims Testing
9	EZ Test, Members, Claim, GPI, NDC Pull
10	Basics of Benefits Scenarios & Testing
11	Basics of Clinical Scenarios & Testing

Automation Concepts, configuration, WebDriver Basics

Continuous Learning: ILT Technical Enablement

Chapter	Chapter Name	Topic
Chapter 5	Locating various Web elements	Find Element by Id,Name,Link Text,Partial Link Text,Class Name,CSS (Tag , ID , Class , Attribute , etc..)
		Handling Shadow DOM in Selenium

Continuous Learning: Technical Enablement through Self-learning

After the Trainer-Led Master session on Selenium chapter topics, trainees should:

1. Practice Tekstac Platform Handson and Review respective BU Training Content chapter's PPT and video learning content.
2. Practice DLE (Daily Learning) hands-on exercises provided in the local environment
3. Submit the solutions for evaluation.
4. Refer to and learn the same topics covered by the trainer on Udemy.

This ensures a thorough understanding and application of the Selenium chapter topics.

Continuous Learning: Technical Hands-on through Tekstac

Mandatory Hands-on

- Find Element by Tag Name
- Handling Check Box
- Find Element by Class Name
- LinkText and PartialLinkText

- Chapter 5_Handson
- Chapter 5_PPT Learning Ref.Content
- Chapter 5_Video Learning Ref.Content[Part-1]
- Chapter 5_Video Learning Ref.Content[Part-2]
- Chapter 5_Video Learning Ref.Content[Part-3]

[Learn Selenium with Java, Cucumber & Frameworks](#)

Refer section 3 in this Udemy course and complete the corresponding Subtopics from 17 to 25

Section 3: Selenium WebDriver

Additional Learning:

Technical Quizzes:

Quiz 1 - Automation Concepts, Selenium configuration, WebDriver Basics

Automation Concepts, configuration, WebDriver Basics

Continuous Learning: ILT Technical Enablement

Chapter	Chapter Name	Topic
Chapter 5	Locating various Web elements	Relative Locators and Chained Locators in Selenium
		Locating By Xpath (Single Slash, Double Slash , contains(), starts_with() , text() , Last())

Continuous Learning: Technical Enablement through Self-learning

After the Trainer-Led Master session on Selenium chapter topics, trainees should:

1. Practice Tekstac Platform Handson and Review respective BU Training Content chapter's PPT and video learning content.
2. Practice DLE (Daily Learning) hands-on exercises provided in the local environment
3. Submit the solutions for evaluation.
4. Practice the Assessment.
5. Refer to and learn the same topics covered by the trainer on Udemy.

This ensures a thorough understanding and application of the Selenium chapter topics.

Learn the basics of WebDriver Basics

[Learn Selenium with Java, Cucumber & Frameworks](#)

Refer section 3 in this Udemy course and complete the corresponding Subtopics from 17 to 25.

Section 3: Selenium WebDriver

GenAI (Day 11)

Continuous Learning: Technical Enablement

AI Accelerate

- By this course you will complete GenAI self-pace learning , AI expert connect session and AI Knowledge check assessment.

Program completion criteria

Everyone must register for the following e-learning course on [C-Learn](#) and complete a KBA assessment on Moodle to successfully finish this program.

Online learning: C-Learn

Activity Code: **ELRNG01863**

Fundamentals of Generative AI [101-Basics]

This AI course is designed to equip learners with:

- The foundational knowledge and skills required to harness the power of Generative AI.
- The ability to identify opportunities for innovation and implementation of AI within their organizations.
- The skills to drive organizations toward a future of enhanced creativity and competitive advantage using AI techniques.

GenAI (Day 13)

Knowledge check - Moodle

Activity Code: **ATHDW335105**

GENERATIVE AI QUICK ASSESSMENT FOR ELEARNING QUIZ [101-BASICS]

- This assessment is to assess the knowledge of associates on Generative AI tools and concepts at a Beginner proficiency.

GenAI

Additional Learning: Technical Enablement

Try to complete the following additional Udemy courses (Optional) to learn more about GenAI and ChatGPT.

Topic name	Course name	Links

Neural Networks	The Complete Neural Networks Bootcamp: Theory, Applications	https://cognizant.udemy.com/course/the-complete-neural-networks-bootcamp-theory-applications/?src=sac&kw=The+Complete+Neural+Networks+Bootcamp%3A+Theory%2C+Applications
GenAI Course	GENERATIVE AI GUIDE: DALL-E, CHATGPT, AND CREATIVITY WITH AI	https://cognizant.udemy.com/course/generative-ai-guide-dall-e-chatgpt-and-creativity-with-ai/
ChatGPT	ChatGPT Masterclass - The Ultimate Guide	https://cognizant.udemy.com/course/chatgpt-complete-masterclass/
Cognizant GenAI Platform	Cognizant Flowsource 101 foundation program [101-BASICS] (ELRNG02089)	ELRNG02089
Introduction to Responsible AI	Responsible AI-Deep Dive [101-BASICS]	https://COGNIZANTLEARNING.sumtotal.host/core/pillarRedirect?relyingParty=LM&url=app%2Fmanagement%2FLMS_ActDetails.aspx%3FActivityId%3D2216335%26UserMode%3D0

Day 16 - Day 17

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Basic Training	
12	Introduction to Query Testing
13	Query Testing - Benefits
14	Query Testing - Clinical
15	Traditional & Xref plan, CLC
16	RXClaim Navigation

Mandatory Hands-on

- Mentor Driven - Hands on

Selenium Automation Techniques, Dynamic XPath

Click Here to View the [BU Mandatory Technical Learning and Handson](#) Document.

Continuous Learning: ILT Technical Enablement

Chapter	Chapter Name	Topic
Chapter 5	Locating various Web elements	Find Element by Id,Name,Link Text,Partial Link Text,Class Name,CSS (Tag , ID , Class , Attribute , etc..)
		Handling Shadow DOM in Selenium
		Relative Locators and Chained Locators in Selenium
		Locating By Xpath (Single Slash, Double Slash , contains(), starts_with() , text() , Last())
		Find options in dropdown. Handle dropdown without using Select Class
		Find Radio Element
		Find Element by Tag Name
Chapter 6	Desired capabilities	Desired Capabilities in Selenium WebDriver

Continuous Learning: Technical Enablement through Self-learning

After the Trainer-Led Master session on Selenium chapter topics, trainees should:

1. Practice Tekstac Platform Handson and Review respective BU Training Content chapter's PPT and video learning content.
2. Practice DLE (Daily Learning) hands-on exercises provided in the local environment
3. Submit the solutions for evaluation.
4. Refer to and learn the same topics covered by the trainer on Udemy.

This ensures a thorough understanding and application of the Selenium chapter topics.

Continuous Learning: Technical Hands-on through Tekstac

Mandatory Hands-on

- CSSLocator
- AbsoluteXPathLocator
- XPathAncestor
- Working with Alerts
- Work with Javascript Executor

BU Training Content - Chapter Wise [BU Mandatory Technical Learning and Handson]

- Chapter 6_Handson
- Chapter 6_PPT Learning Ref.Content
- Chapter 6_Video Learning Ref.Content

Learn the basics of Automation Techniques and Dynamic Xpath

[Learn Selenium with Java, Cucumber & Frameworks](#)

Refer section 3 in this Udemy course and complete the corresponding Subtopics from 26 to 32.

Section 3: Selenium WebDriver

Selenium Automation Techniques, Dynamic XPath

Continuous Learning: ILT Technical Enablement

Chapter	Chapter Name	Topic
Chapter 7	selenium webdriver commands and Web elements interactions	Selenium WebDriver- Commands
		Text fields and buttons
		Find Element VS FindElements in Selenium WebDriver - check order
		Handling Canvas Elements in Selenium
		Using JavaScript Executor in Selenium

Continuous Learning: Technical Enablement through Self-learning

After the Trainer-Led Master session on Selenium chapter topics, trainees should:

1. Practice Tekstac Platform Handson and Review respective BU Training Content chapter's PPT and video learning content.
2. Practice DLE (Daily Learning) hands-on exercises provided in the local environment
3. Submit the solutions for evaluation.
4. Refer to and learn the same topics covered by the trainer on Udemy.

This ensures a thorough understanding and application of the Selenium chapter topics.

Continuous Learning: Technical Hands-on through Tekstac

Mandatory Hands-on

- Handling RegEx Selenium
- Drag and Drop with Slider and Actions and wait
- Selenium – ScreenShot
- Selenium - DatePicker(Actions Class)
- FindElements

BU Training Content - Chapter Wise [BU Mandatory Technical Learning and Handson]

- Chapter 7_Handson

- Chapter 7_PPT Learning Ref.Content
- Chapter 7_Video Learning Ref.Content

Learn the basics of Automation Techniques and Dynamic Xpath

[Learn Selenium with Java, Cucumber & Frameworks](#)

Refer section 3 in this Udemy course and complete the corresponding Subtopics from 26 to 32.

Section 3: Selenium WebDriver

Note: On Day 16 - Once completing Udemy course, Learnings, all Hands-on & Practice assessments related to **Selenium-Web Driver** skill appear for the **Code Challenge Assessment**. This will help you to assess and apply the concepts of the skill learnt on the platform.

Code Challenge

Assess-Type-1: Code Challenge - Automation Concepts, Selenium configuration, WebDriver Basics

Assessment Duration: 2 hrs.

Assessment Attempts: 3

No. of Questions appear in each attempt: 1

Day 18 - Day 19

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
1	NIF Query
2	NIF Claims
3	Tier Status, Days Supply
4	TF window/Cumulative, Emergency Supply, New Patient, Renew Member

Mandatory Hands-on

- Mentor Driven - Hands on

Selenium Automation Techniques, Dynamic XPath

Continuous Learning: ILT Technical Enablement

Chapter	Chapter Name	Topic
Chapter 8	WebDriver Actions	Mouse and keyboard actions
		Drag and drop
		Handling frames and windows
		mouse hover (tool tip) in Selenium
		Handling tabs & cookies

Continuous Learning: Technical Enablement through Self-learning

After the Trainer-Led Master session on Selenium chapter topics, trainees should:

1. Practice Tekstac Platform Handson and Review respective BU Training Content chapter's PPT and video learning content.
2. Practice DLE (Daily Learning) hands-on exercises provided in the local environment
3. Submit the solutions for evaluation.
4. Refer to and learn the same topics covered by the trainer on Udemy.

This ensures a thorough understanding and application of the Selenium chapter topics.

Continuous Learning: Technical Hands-on through Tekstac

Mandatory Hands-on

- Handling ToolTip
- Working with different XPath conditions
- PurchaseApp iframe
- Multiple Window
- Selenium - Implicit Wait
- Selenium - Fluent Wait

Best Practices- Real Time Technical Hands-on

- Desired Capabilities
- Shadow_DOM_Scenario1
- Shadow_DOM_Scenario2
- Relative Locators and Chained Locators in Selenium

BU Training Content - Chapter Wise [BU Mandatory Technical Learning and Handson]

- Chapter 8_Handson
- Chapter 8_PPT Learning Ref.Content
- Chapter 8_Video Learning Ref.Content

Learn the basics of Automation Techniques and Dynamic Xpath

Refer section 3 in this Udemy course and complete the corresponding Subtopics from 26 to 32.

Section 3: Selenium WebDriver

Selenium Automation Techniques, Dynamic XPath

Continuous Learning: ILT Technical Enablement

Chapter	Chapter Name	Topic
Chapter 9	Multiple windows & frames	Switching between windows
		Switching to frames & iFrames
	WebDriver Waits	Implicit waits
		Explicit waits
		Fluent waits

Chapter	Chapter Name	Topic
Chapter 10	Selenium Automation Techniques	Checkbox Handling and Form Submission
		Locating Web Element Attributes using CSS Selector
		Locating Web Element Attributes using Absolute XPath Locator
		Identifying Ancestors of Web Elements
		Working with alerts
		Working with Java script executor
		Working with Regular expression
		Working with Drag and Drop and Slider
Chapter 11	Advanced WebDriver techniques	Selenium - ScreenShot
		Handling JavaScript/window Alerts
		Headless browsers and drivers in Selenium
		Handling Dynamic Elements in Selenium
		1) get methods , 2) conditional methods, 3) browser methods, 4) navigational methods, 5) wait methods
		How to Find All/Broken links using Selenium Webdriver

Continuous Learning: Technical Enablement through Self-learning

After the Trainer-Led Master session on Selenium chapter topics, trainees should:

1. Practice Tekstac Platform Handson and Review respective BU Training Content chapter's PPT and video learning content.
2. Practice DLE (Daily Learning) hands-on exercises provided in the local environment
3. Submit the solutions for evaluation.
4. Take Up the Assessment.
5. Refer to and learn the same topics covered by the trainer on Udemy.

This ensures a thorough understanding and application of the Selenium chapter topics.

BU Training Content - Chapter Wise [BU Mandatory Technical Learning and Handson]

- Chapter 9_Handson
- Chapter 9_PPT Learning Ref.Content
- Chapter 9_Video Learning Ref.Content
- Chapter 10_Handson
- Chapter 10_PPT Learning Ref.Content
- Chapter 10_Video Learning Ref.Content
- Chapter 11_Handson
- Chapter 11_PPT Learning Ref.Content
- Chapter 11_Video Learning Ref.Content

Continuous Learning: Technical Hands-on through Tekstac

Best Practices- Real Time Technical Hands-on

- Relative Locators and Chained Locators in Selenium_Scenario 1
- Relative Locators and Chained Locators in Selenium_Scenario 2
- Relative Locators and Chained Locators in Selenium_Scenario 3
- Relative Locators and Chained Locators in Selenium_Scenario 4

[Learn Selenium with Java, Cucumber & Frameworks](#)

Refer section 3 in this Udemy course and complete the corresponding Subtopics from 26 to 32.

Section 3: Selenium WebDriver

Additional Learning:

Technical Quizzes:

Quiz 1 - Selenium Automation Techniques, Dynamic Xpath

Day 20 – Day 21

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
5	Copay

6	Accums (Ded and OOP)
7	Deductible Limits & Reset and MOOP
8	Deductible Exclusion Tier & GPIs
9	Maximum Out of Pocket Limits & Reset
10	Maximum Allowable Benefits
11	Lifetime/Annual MAB

Mandatory Hands-on

- Mentor Driven - Hands on

Selenium Webdriver with POM and ApachePOI

Click Here to View the [BU Mandatory Technical Learning and Handson](#) Document.

Continuous Learning: ILT Technical Enablement

Chapter	Chapter Name	Topic
Chapter 12	Calendar using action	Selenium - DatePicker(Actions Class)
	Apache POI	Apache POI - Read Operation : Excel Read Operation
		Apache POI - Write Operation: Excel Write Operation
		Applying POI POM- Flight reservation

Continuous Learning: Technical Enablement through Self-learning

After the Trainer-Led Master session on Selenium chapter topics, trainees should:

1. Practice Tekstac Platform Handson and Review respective BU Training Content chapter's PPT and video learning content.
2. Practice DLE (Daily Learning) hands-on exercises provided in the local environment
3. Submit the solutions for evaluation.
4. Refer to and learn the same topics covered by the trainer on Udemy.

This ensures a thorough understanding and application of the Selenium chapter topics.

Continuous Learning: Technical Hands-on through Tekstac

Mandatory Hands-on

- Excel Read Operation
- Excel Write Operation
- Applying POI - Flight reservation

BU Training Content - Chapter Wise [BU Mandatory Technical Learning and Handson]

- Chapter 12_PPT Learning Ref.Content
- Chapter 12_Video Learning Ref.Content

Learn the basics of WebDriver with POM and ApachePOI

[Learn Selenium with Java, Cucumber & Frameworks](#)

Refer section 4 in this Udemy course and complete the corresponding learnings.

Section 4: Apache POI - Data Driven Testing using MS Excel

Note: On Day 20- Once completing Udemy course, Learnings, all Handson & Practice assessments related to **Selenium – Xpath** skill appear for the **Code Challenge Assessment**. This will help you to assess and apply the concepts of the skill learnt in the platform.

Code Challenge

Assess-Type-1: Code Challenge - Selenium Automation Techniques, Dynamic Xpath

Assessment Duration: 2 hrs.

Assessment Attempts: 3

No.of Questions appear in each attempt: 1

Day 22 - Day 23

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
12	Diagnosis Required
13	Excluded Drugs
14	Refill Threshold
15	Part B Drug Coverage/Drug Coverage

Mandatory Hands-on

- Mentor Driven - Hands on

Selenium Webdriver with POM and ApachePOI

Learn the basics of WebDriver with POM and ApachePOI

Refer section 4 in this Udemy course and complete the corresponding learnings.

Section 4: Apache POI - Data Driven Testing using MS Excel.

Continuous Learning: Technical Hands-on through Tekstac

Mandatory Hands-on

- POM with Page Factory Model

Continuous Learning: Technical Hands-on

Best Practices- Real Time Technical Hands-on

- Mouse_Keyboard_Actions_Cookie_Scenario 1
- Mouse_Keyboard_Actions_Cookie_Scenario 2
- Mouse_Keyboard_Actions_Cookie_Scenario 3
- Mouse_Keyboard_Actions_Cookie_Scenario 4
- Mouse_Keyboard_Actions_Cookie_Scenario 5
- Mouse_Keyboard_Actions_Cookie_Scenario 6
- Mouse_Keyboard_Actions_Cookie_Scenario 7

Selenium Webdriver With POM and ApachePOI

Continuous Learning: Technical Enablement

Learn the basics of WebDriver with POM and ApachePOI

Refer section 4 in this Udemy course and complete the corresponding learnings.

Section 4: Apache POI - Data Driven Testing using MS Excel

Note: On Day 22 - Once completing Udemy course, Learnings, all Handson & Practice assessments related to **Selenium – Apache POI** skill appear for the **Code Challenge Assessment**. This will help you to assess and apply the concepts of the skill learnt on the platform.

Code Challenge

Assess-Type-1: Code Challenge - Selenium Webdriver with POM and ApachePOI

Assessment Duration: 2 hrs.

Assessment Attempts: 3

No.of Questions appear in each attempt: 1

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
16	OCC (Secondary Coverage and COB)
17	Balance on Hand
18	Automated Overrides
19	SCC Code (03,04, 05 and 13)
20	Prescribers, NPI - Including Excluded Prescribers
21	Excluded Prescribers (State and Federal) and Pharmacy

Mandatory Hands-on

- Mentor Driven - Hands on

Automation Testing - Selenium with TestNG

You will be focusing on Selenium with TestNG

Udemy learnings are recommended in the Platform to understand the fundamental concepts. Apply the concepts learned and solve the Hands-on and Practice Case studies as recommended below.

Click Here to View the [BU Mandatory Technical Learning and Handson](#) Document.

Continuous Learning: ILT Technical Enablement

Chapter	Chapter Name	Topic
Chapter 13	TestNG Concepts	TestNG Assertions
		Introduction to TestNG
		Creating TestNG test cases
		TestNG annotations and assertions
		Data-Driven Testing in TestNG
		Running Tests in Parallel using TestNG

Continuous Learning: Technical Enablement through Self-learning

After the Trainer-Led Master session on Selenium chapter topics, trainees should:

1. Practice Tekstac Platform Handson and Review respective BU Training Content chapter's PPT and video learning content.
2. Practice DLE (Daily Learning) hands-on exercises provided in the local environment

3. Submit the solutions for evaluation.
4. Refer to and learn the same topics covered by the trainer on Udemy.

This ensures a thorough understanding and application of the Selenium chapter topics.

Continuous Learning: Technical Hands-on through Tekstac

Mandatory Hands-on

- TestNG Assertions
- TestNG with two test classes
- Contact Book- POM structure
- TestNG Annotation With Priority
- TestNG Dependency

BU Training Content - Chapter Wise [BU Mandatory Technical Learning and Handson]

- Chapter 13_Handson
- Chapter 13_PPT Learning Ref.Content
- Chapter 13_Video Learning Ref.Content

Learn the basics of Selenium with TestNG

[Learn Selenium with Java, Cucumber & Frameworks](#)

Refer section 5,6,7 in this Udemy course and complete the corresponding learnings.

Section 5: TestNG Framework for Selenium

Section 6: Page Object Model

Section 7: Hybrid Driven Framework Development with Project (eCommerce Application)

Day 23, Day 24 & Day 25 Interim Technical Evaluation

Day 26 – Day 27

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
22	FML
23	CMS Labeller
24	Natural Disaster and emergency situations

Mandatory Hands-on

- Mentor Driven - Hands on

Automation Testing - Selenium with TestNG

Continuous Learning: ILT Technical Enablement

Chapter	Chapter Name	Topic
Chapter 13	TestNG Concepts	Multi-browser testing using TestNG*
		Rerun failed tests*
		Set Test priority in TestNG
		Dependency in TestNG
		Soft /Hard Assertion in TestNG
		TestNG Report Generation in Selenium WebDriver*
		Customize, PDF & Email TestNG Reports in Selenium WebDriver*
	TestNG Class	TestNG with two test classes
	Data driven	Data driven from XML + POM : Contact Book- POM structure

Continuous Learning: Technical Enablement through Self-learning

After the Trainer-Led Master session on Selenium chapter topics, trainees should:

1. Practice Tekstac Platform Handson and Review respective BU Training Content chapter's PPT and video learning content.
2. Practice DLE (Daily Learning) hands-on exercises provided in the local environment
3. Submit the solutions for evaluation.
4. Refer to and learn the same topics covered by the trainer on Udemy.

This ensures a thorough understanding and application of the Selenium chapter topics.

Continuous Learning: Technical Hands-on through Tekstac

Mandatory Hands-on

- Cargo Shipping
- Shopify Registration
- XMLParsing -1
- XMLParsing -2
- XMLParsing -3

Learn the basics of Selenium with Datasource XML Parsing (With XML & JSON)

[Learn API Technical Writing: JSON and XML for Writers](#)

Refer sections 1, 2, 3 and 4 in this Udemy course and complete the corresponding learnings.

Section 1: Introduction

Section 2: JSON

Section 3: XML

Section 4: Final Words

Rehearse the below Lend a hand enablement given in platform

- XMLParser_Enablement

Followed by refer “Lend-a-Hand” code template with solution

- XML Parsing

Day 28 – Day 29

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
25	EGWP or STCOB
26	Vaccine
27	Seasonal, Non Seasonal & Travel Vaccines
28	COVID Testing - Vaccine, OTC Test Kit and Antiviral
29	Script Sync

Mandatory Hands-on

- Mentor Driven - Hands on

Automation Testing - Selenium with TestNG

Continuous Learning: Technical Enablement

Learn the basics of Selenium with Datasource JSON Parsing (With XML & JSON)

Rehearse the below Lend a hand enablement given in platform

- JSONParsing_Enablement

Followed by refer “Lend-a-Hand” code template with solution

- JSON Parsing
- Json Solution Explanation

Continuous Learning: Technical Hands-on through Tekstac

Mandatory Hands-on

- JSONParsing – 1
- JSONParsing – 2
- JSONParsing – 3

NOTE: On Day 28: Once completing Udemy course, Learnings, all Hands-on & Practice assessments related to **Selenium – TestNG** skill appear for the **Code Challenge Assessment**. This will help you to assess and apply the concepts of the skill learnt on the platform.

Code Challenge - Assess-Type-1: Code Challenge - Selenium with TestNG

Assessment Duration: 2 hrs.

Assessment Attempts: 3

No. of Questions appear in each attempt: 1

Day 30

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
30	DUR

Mandatory Hands-on

- Mentor Driven - Hands on

Automation Framework

Continuous Learning: ILT Technical Enablement

Chapter	Chapter Name	Topic
Chapter 14	Test Automation Frameworks	Introduction to Automation Frameworks
		Data-Driven Testing in Selenium
		Keyword-Driven Testing Framework in Selenium
		Page Factory
		Building a Modular Testing Framework in Selenium
		Hybrid Framework
	Design Patterns (POM)	Understanding Page Object Model (POM) in Selenium
		Creating Page Classes in Selenium
		Implementing Page Factory in Selenium
		Design Patterns in Automation using Selenium (Singleton, Factory etc.)
Chapter 15	Test Data Handling	Reading and Writing Data to Files (e.g., Excel, CSV , XML, JSON) using Java
		Test Data Parameterization in Selenium
Chapter 16	Test Report and Test Log	Generating Detailed Test Reports (Extent Reports, Allure Reports)
		Screenshot Capture Strategies in Selenium
		Custom Logging with Log4j in Selenium

Continuous Learning: Technical Enablement through Self-learning

After the Trainer-Led Master session on Selenium chapter topics, trainees should:

1. Practice Tekstac Platform Handson and Review respective BU Training Content chapter's PPT and video learning content.
2. Practice DLE (Daily Learning) hands-on exercises provided in the local environment
3. Submit the solutions for evaluation.
4. Refer to and learn the same topics covered by the trainer on Udemy.

This ensures a thorough understanding and application of the Selenium chapter topics.

BU Training Content - Chapter Wise [BU Mandatory Technical Learning and Handson]

- Chapter 14_Handson
- Chapter 14_PPT Learning Ref.Content
- Chapter 14_Video Learning Ref.Content[Part-1]
- Chapter 14_Video Learning Ref.Content[Part-2]
- Chapter 14_Video Learning Ref.Content[Part-3]
- Chapter 15_Handson
- Chapter 15_PPT Learning Ref.Content
- Chapter 15_Video Learning Ref.Content

- Chapter 16_Handson
- Chapter 16_PPT Learning Ref.Content
- Chapter 16_Video Learning Ref.Content[Part-1]

Day 31

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
31	MIC - MIC, MIC Copay and MIC SCC 08
32	DAW

Mandatory Hands-on

- Mentor Driven - Hands on

NOTE: On Day 31- Once completing Udemy course, Learnings, all Handson & Practice assessments related to **Selenium** skill appear for the **MOCK ICT Assessment**. This will help you to assess and apply the concepts of the skill learnt in the platform.

Integrated Capability Test (ICT) - SELENIUM MOCK

Assessment Duration: 2 hrs.

Assessment Attempts: 1

No.of Questions appear in each attempt: 1

Day 32

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
33	ESRD
34	Government Claims
35	Transplant
36	Hospice Scenarios

Mandatory Hands-on

- Mentor Driven - Hands on

Day 33

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
37	High Cost Tier DS
38	LICS (1,2,3) Copayments
39	VBID
40	MOOP scenarios using Part B drugs

Mandatory Hands-on

- Mentor Driven - Hands on

Day 34

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
41	MedD Excluded scenarios

Mandatory Hands-on

- Mentor Driven - Hands on

Day 35

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
42	Opioid Coverage
43	OTC

Mandatory Hands-on

- Mentor Driven - Hands on

MOCK Evaluation through AI BOT

This is an auto-scheduled, AI-driven mock interview, intended to be taken before the Final evaluation. You will receive an auto-scheduled email notification three hours prior to the evaluation.

Details:

- Platform: Mail-driven platform
- Scope: AI will ask questions based on everything you have learned up to date
- Duration: 1.5 hours
- Questions: 15 skill-based Coding questions

Once you complete the evaluation, AI will provide feedback on your performance. This helps you to appear for Final Evaluation.

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
44	Mchoice/Maintenance drug day supply

Mandatory Hands-on

- Mentor Driven - Hands on

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
45	Prudent network coverage

Mandatory Hands-on

- Mentor Driven - Hands on

Day 38

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
46	HCR coverage

Mandatory Hands-on

- Mentor Driven - Hands on

Day 39

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
47	Emergency Supply for 3/5 days
48	Brand over generic
49	Third party exceptions

Mandatory Hands-on

- Mentor Driven - Hands on

Day 40

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
50	Network specific copay
51	High dollar rejection
52	Specialty day supply

Mandatory Hands-on

- Mentor Driven - Hands on

SELENIUM Assess-Type-2: Integrated Capability Test (ICT)

NOTE: On Day 40 - Once completing Udemy course, Learnings, all Handson & Practice assessments related to **Selenium** skill appear for the **Selenium ICT Assessment**. This will help you to assess and apply the concepts of the skill learnt in the platform.

Assessment Duration: 4 hrs.

Assessment Attempts: 3

No.of Questions appear in each attempt: 1

Day 41

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Plan Benefits	
53	Broader Vaccine with \$0 and Custom Copayment
54	MedVac

Mandatory Hands-on

- Mentor Driven - Hands on

Day 42

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Formulary & Utilization Management	
1	Formulary Testing
2	Negative Formulary

Mandatory Hands-on

- Mentor Driven - Hands on

Day 43

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Formulary & Utilization Management	
3	SAM UM Validation

Mandatory Hands-on

- Mentor Driven - Hands on

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, Refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Formulary & Utilization Management	
4	Prior Authorization (PA, HRM PA, BvD PA, New Start PA) and CPM

Mandatory Hands-on

- Mentor Driven - Hands on

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Formulary & Utilization Management	
5	Quantity Limits, DD,QVT, Max Qty Fill
6	Multisource Code, Rx/OTC

Mandatory Hands-on

- Mentor Driven - Hands on

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Formulary & Utilization Management	
7	Step Therapy
8	Duplicate Therapy

Mandatory Hands-on

- Mentor Driven - Hands on

Day 47

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Formulary & Utilization Management	
9	UPPL, Package vs Time, Package Max
10	Benefit Reset Date Specific testing (Rolled out only in MVP)

Mandatory Hands-on

- Mentor Driven - Hands on

Day 48

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Formulary & Utilization Management	
11	Min Age & Max Age, Age_Range
12	Gender, High Dollar, Amount Due

Mandatory Hands-on

- Mentor Driven - Hands on

Day 49

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Formulary & Utilization Management	
13	FVT, Maximum Days Supply, DSVT

Mandatory Hands-on

- Mentor Driven - Hands on

Day 50

Healthcare Domain

Continuous Learning: Technical Enablement

To learn the basics of Healthcare, refer below section and complete the corresponding learnings.

- [HEALTHCARE AHM250](#)

Formulary & Utilization Management	
14	Smart PA

Mandatory Hands-on

- Mentor Driven - Hands on

CODE Companion Tool – GitHub Copilot

- Complete all the self-learning courses provided in the Learning Path at Tekstac under
- **“GenAI Code Assist (GitHub Copilot)” and master class session as planned.**

Prompt Engineering	
Topic	Key Coverage / Outcome
Prompt Engineering	Prompting techniques, best practices, ethics, hands-on lab

GitHub Copilot	
Topic	Key Coverage / Outcome
Introduction to GitHub Copilot	Overview of GitHub Copilot features
Setup and Configuration	Beginner-friendly coding with Copilot
Core Features and Capabilities	• Code suggestions and completions • Writing functions and boilerplate code • Generating comments and documentation • Refactoring and optimizing code • Creating test cases
Security and Ethical Considerations	• Understanding AI-generated code risks • Licensing and attribution concerns • Data privacy and usage policies • Responsible use of Copilot
Best Practices	• Reviewing AI-generated code • Combining Copilot with manual coding • Using Copilot for learning new languages • Avoiding over-reliance

Evaluation:

Final Technical Evaluation

What is Final Evaluation?

The Final Evaluation will be conducted to certify whether a GenC is eligible to enter into the BU or not. The skill of a GenC will be gauged on the application development and overall technical knowhow towards the end of GenC Training.

Tech SME from BU will be conducting the final tech evaluation. As a fallback, the project mentor can also steer this activity.

The final evaluation will be conducted as two phases. They are the following

1. Final Technical Evaluation

- JF2F(face to face)
- Video Based

1. Final Technical Evaluation (FTE)

The BU Mentor will interview the GenC on various skills achieved throughout the training program and put a score which will be considered for the final PHS of the GenC.

How to learn each day?

Each day has a set of learning objectives. These learning objectives can be met by going through the UdeMy courses and by completing the hands-on exercises mentioned in the daily plan.

The below strategies will help you decide the learning approach.

Learning Strategy & Approach

Find below few imaginary profiles. For each of these profiles we have defined a recommended learning approach. This is not an exhaustive list. The approaches below might help invent a new way of learning.

Profile #1

Harry Reacher

Engineering Discipline: Electronics

Skills: Python, Ruby on Rails, nginx

Project: Mining Crime Data to get Route Cause Insights

Learning Approach to Programming Languages: I do not want to waste my time learning. I am more practice oriented. I want to work on the problem immediately

What will work for me?

- Directly complete hands on exercises
- Refer Internet or Udemy Courses
- If hands on are implemented early, clarify your friends questions and troubleshoot their issues

Profile #2

Olivia Richards

Engineering Discipline: Computer Science

Skills: Java, C, C++

Project: Library Management System

Learning Approach to Programming Languages: I have interest, but I don't know where to start.

What will work for me?

- Go through the recommended Udemy Course
- Try completing the hands on exercises
- Get your clarifications solved with help from Tech SME
- Get help from other learners in your batch whom had already completed

Profile #3

Greg Anderson

Engineering Discipline: Civil

Skills: C

Project: Fiber reinforced concrete

Learning Approach to Programming Languages: I am scared of programming languages. I haven't got my hands dirty with coding

What will work for me?

- Go through the recommended Udemy Course
- Implement the coding along with the author of the Udemy Course
- Try completing the hands on exercises
- Clarify queries with SME

FAQ

1. Who can participate in this program?

Students who have enrolled for Full Internship Program (or) the Cognizant on-boarded GEN Cs can participate in this program.

2. Is there any pre-learning I should do?

No. This program is open to all students from any academic discipline.

3. How will I know my RAG status?

It will be shown to you in the GEN C learn Platform, in your Home Page.

4. Whom do I reach out in case of any queries?

Coach is your point of contact.

5. What is the significance of Hands-on in the overall learning journey?

Hands-on focuses on specific topics in a Skill, which you can try and execute in the Platform. Group of such Hands-on exercises will be packaged together as a Code Challenge. This Code Challenge will allow you to benchmark your skills in the learning journey. Hands On/ Code Challenges/ ICT are learning components which will help you in understanding the skills better.

6. What is Code Challenge?

A problem statement will be provided to you and you need to solve it using a single skill.

7. What is Integrated Capability Test (ICT)?

A case study problem statement will be provided to you, that you may need solve using the combination of Skills learnt in the given stage.

8. How many attempts are provided for the Coding challenge and ICTs? Is it open all the time for practice?

The Coding challenges and ICTs are open and there are 3 attempts to take them up.

9. What is the entry criteria for qualifier?

A minimum of 70% hands-on completion and attempt in the CC & ICT is the eligibility criteria for qualifier.

10. What skills are covered in the qualifier?
The skills of Stage 1 are covered in the qualifier. Only ONE attempt is provided to clear with a minimum score of 70%
11. What if I fail in the Interim evaluation?
Your coach will notify your performance in the Interim evaluation. However you can continue with the learning.
12. How many chances will I get in the Final evaluation?
You'll get 2 chances in the Final evaluation which covers ALL the skills in the learning journey.
13. Whom do I reach out in case of any queries?
Coach is your point of contact.
